

My wife & I are appalled at the attempts by 'broadcast radio' companies to kill what will one day surely be referred to as 'the best thing to ever happen for automobile drivers'! You only have to take a short spin in a car equipped w/XM satellite radio to become an ardent believer! Take a cross-country trip and you'll KILL anyone threatening to take this blessed revelation away from you! PLEASE don't let the lobbyists sway you . . .believe in the masses that are just starting to enjoy commercial free music! Try it yourself & you'll see!Tks for listening, RMH
